TERRAZZO
— & MOSAIC ASSOCIATION —

What is Venetian Terrazzo?

Premium option with larger aggregates

- Elegant, classic, traditional Italian-style finish.
- Coarse-grained aggregate mix of size #3-8 chips instead of size #1-2.
- Marble or other natural stones are typically used.
- Bolder, more graphic, and textured than standard terrazzo.
- Highlights the color and texture of the stones.
- A thicker-than-standard epoxy matrix pour is required to accommodate the larger stones.
- Divider strips must match the height of the Venetian aggregate.
- The slab may need to be recessed to accommodate extra thickness.

Like Standard Terrazzo

- Venetian terrazzo is versatile and 100% customizable, with infinite color and aggregate mix options.
- Durable, low maintenance.
- Can be repaired and refinished.
- Unbeatable life cycle cost-effectiveness.
- Irregularly shaped aggregate chips are scattered by hand or mixed in with the poured matrix.
- Sustainable, low-VOC, Greenguard certified.
- Seamless, resilient surface.
- Non-slip coatings or strips are options.
- Can be installed with traditional cement or epoxy matrix.
- Smaller aggregates can be mixed in for a variety of aesthetics.
- Can be applied to walls, stairs, curbs, benches, planters, countertops, columns, and sculptures.
