TECHNICAL BULLETIN #T-23

8/13

---

(Formerly TB#109)

## HEAVY TOP ANGLE STRIPS IN EPOXY TERRAZZO

This bulletin deals with 1/8-inch, 1/4-inch or any two component “heavy top” strips when used in a 1/4-inch-thick epoxy terrazzo system. The strip design is such that it is virtually impossible to properly grind and polish the terrazzo without destroying the integrity of the exposed strip. There is only a thin layer of metal above the top edge of the 20-gauge L-shaped lower section, and it is often completely removed during the grinding process.

Consequently, the strip is split into three sections and has an undesirable appearance. This Association recommends that only single component strips be used in 1/4-inch-thick epoxy terrazzo.
